

THINKING OF GETTING YOUR DASHPAD RECONDITIONED?

If you're ready to send off your dashpad you want to be sure that you have one that's suitable for reconditioning.

What's OK?

- Cracks in the vinyl and exposed padding, even deep cracks are ok.
- Sun damaged and brittle vinyl is fine.

What's **NOT** OK?

- If the Dashpad is bent.
- If the spine of the Dashpad is broken or rusted out.
You can check this by holding either end and giving a little twist. You don't want to hear any cracks or snaps that indicate that the metal spine is broken.
- If it has been recovered before as old glue and products can ruin the process.

If you have a Premier or Brougham, we recommend that you have the dashpad and side panels done together so that the colour is consistent.

If you are having trouble finding a courier, we can organise for your dashpad to be picked up.

We recommend buying a length of poly plumbing pipe to send it away in.

All of our Dashpads are packed securely in Poly pipe for transportation.

Don't hesitate to give Cherie a call if you have any questions 0476 902 610.
